

This comment is in support of existing FM translator service provided by K-LOVE and against services such as K-LOVE being displaced by Low Power FM translators.

K-LOVE provides a valuable service to my local community as an alternative to commercial radio. As more radio stations are purchased and owned by fewer communications corporations, there are fewer alternatives available to the public. I believe that the service offered by K-LOVE is an important alternative to commercial FM stations that is definitely in the public interest. I am in full support of policies that continue its operation and oppose policy changes that would cause it to discontinue operation.
